Sir:

SUMMARY OF INTERVIEW CONDUCTED FEBRUARY 6, 2007

The following summarizes an interview conducted by the undersigned with Examiner Pham, responsible for the above-identified application, on February 6, 2007.

During the interview claims 35, 40, 41 and 44 were discussed. Differences between those claims and prior art of record, namely, Johnson et al. U.S. Patent 6,970,077 and Rhoades et al. U.S. Patent 6,741,174 were also discussed. Examiner Pham indicated, subject to further consideration, that pending claims 35-39 appeared more likely to be allowable than any of the other claims. Examiner Pham agreed to consult with his supervisor as to allowability of pending claims 35-39.

It is believed that the above represents an accurate summary of the noted interview. In the event that there are omissions or deficiencies in connection therewith, it is requested that the undersigned be contacted so as to address those omissions or inefficiencies.

Respectfully submitted,

WELSH & KATZ, LTD.
